New Hampshire's LIHEAP Funding Down 31% from FV10 to FV15

The Low Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of
vulnerable American families. After long underfunding LIHEAP, Congress appropriated \$5.1 billion for the program in
FY09 and FY10, and \$4.7 billion in FY11. Since then, funding has fallen to \$3.39 billion in FY16. As a result, more than one
million eligible US households are not receiving assistance each year, and individual grants have been reduced from an
average of \$520 to \$413 per year. This is occurring even while the number of at-risk households remains virtually unchanged
from their all-time highs. <sup>3</sup>

### Why Fund LIHEAP at \$4.7 Billion?

2014

State<sup>2</sup>

New Hampshire

#### LIHEAP is Not an Entitlement:

Unlike entitlement programs that receive funding increases with growth in the eligible population, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, the income *maximum* is 150 percent of the federal poverty guideline or 60 percent of a state's median income. For example, 150 percent of the FY17 poverty guideline for a family of three is \$30,135.<sup>4</sup> Most LIHEAP recipients earn much less than the maximum thresholds: the most recent data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.<sup>5</sup>

#### The Need for LIHEAP Remains High:

In 2014, the national poverty rate was 14.8 percent, and 46.7 million Americans lived in poverty. These numbers, at or near all-time US highs, have been virtually unchanged since the end of the recession.<sup>6</sup>

#### LIHEAP Prioritizes Vulnerable Households:

State LIHEAP administrators report that nearly 73 percent of LIHEAP recipient households had at least one vulnerable person – a senior age 60 or older, a child age 5 and under, or an individual with a disability.<sup>7</sup>

#### **LIHEAP Helps Veterans:**

LIHEAP recipient households containing a veteran jumped 150+ percent over three years – from about 700,000 in FY08 to 1.78 million in FY11.8

NEUAC's Recommendation to Congress: NEUAC urges Congress to restore LIHEAP to at least \$4.7 billion, to concentrate funds in base grants, and to reject efforts that siphon appropriated funds from LIHEAP's core energyassistance mission.
