Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits houshold income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.⁶

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 18 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.
