Gross LIHEAP allocation
to Alabama in 2019

\$54,194,918

for utility payment assistance and
home weatherization programs¹

Alabama LIHEAP funding down

7.83%

from FY10 to FY19

498,171

of households eligible for LIHEAP in
Alabama²

78,584

of low-income households that received
LIHEAP in Alabama in 2019

Only 15.77% of the total eligible population in Alabama received LIHEAP in 2019

82.98%

of LIHEAP recipients in
Alabama have at least one
vulnerable member:

elderly over 60
43.81%

disabled
62.60%

child under 6
17.71%

Federal home heating/cooling assistance saves Alabama lives.

NEUAC urges Congress to protect LIHEAP funding for FY21.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.⁶

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 18 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.

For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.⁶

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 18 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.

44.13%

disabled
34.20%

child under 6
16.37%

Federal home heating/cooling assistance saves Illinois lives.

NEUAC urges Congress to protect LIHEAP funding for FY21.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

46.48%

disabled
33.68%

child under 6
13.96%

Federal home heating/cooling assistance saves Massachusetts lives.

NEUAC urges Congress to protect LIHEAP funding for FY21.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.⁶

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 18 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.⁶

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 18 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.

Only 31.14% of the total eligible population in New Mexico received LIHEAP in 2019

67.20%

of LIHEAP recipients in New Mexico have at least one vulnerable member:

elderly over 60
27.97%

disabled
44.09%

child under 6
18.22%

Federal home heating/cooling assistance saves New Mexico lives.

NEUAC urges Congress to protect LIHEAP funding for FY21.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

PROTECT LIHEAP IN 2021

Rhode Island By the Numbers

<p>Gross LIHEAP allocation to Rhode Island in 2019</p> <p>\$23,722,645</p> <p>for utility payment assistance and home weatherization programs¹</p>	<p>Rhode Island LIHEAP funding down</p> <p>20.03%</p> <p>from FY10 to FY19</p>
<p>132,290</p> <p># of households eligible for LIHEAP in Rhode Island²</p>	<p>29,756</p> <p># of low-income households that received LIHEAP in Rhode Island in 2019</p>

Only 22.49% of the total eligible population in Rhode Island received LIHEAP in 2019

88.24%

of LIHEAP recipients in Rhode Island have at least one vulnerable member:

elderly over 60
40.16%

disabled
29.44%

child under 6
18.64%

Federal home heating/cooling assistance saves Rhode Island lives.

NEUAC urges Congress to protect LIHEAP funding for FY21.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.⁶

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 18 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.

NEUAC urges Congress to protect LIHEAP funding for FY21.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 150 percent of the FY20 poverty guideline for a family of three is \$31,995.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.⁶

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 18 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.
