vulnerable member:

elderly over 60
28.58%

disabled
50.98%

child under 6
20.16%

Federal home heating/cooling assistance saves Missouri lives.

NEUAC urges Congress to protect LIHEAP funding for FY19.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated \$5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.³

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal law sets the income maximum at 150 percent of the federal poverty guideline, or 60 percent of a state's median income. For example, 150 percent of the FY17 poverty guideline for a family of three is \$30,630.⁴ Most LIHEAP recipients earn much less than the maximum thresholds: the latest data show that a typical LIHEAP recipient household had a median income of 83.5 percent of the federal poverty guideline.⁵

The need for LIHEAP remains high.

In 2015, the national poverty rate was 13.5 percent, and 43.1 million Americans lived in poverty. These numbers remain above pre-recession levels.⁶

LIHEAP prioritizes vulnerable households.

More than 70 percent of LIHEAP recipient households had at least one vulnerable person - a senior aged 60 or older, a child aged 5 or under, or an individual with a disability.⁷

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing \$400.⁸ LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.
